## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Blanchard et al. (US 6,415,164 B1).

Regarding claim 1, Blanchard discloses a mobile communication device (Fig. 2) comprising: a plurality of functions to support a plurality of activities to be performed using the mobile communication device, the activities including at least a call activity (Blanchard: Col. 2, lines 26 – 51); a navigation button (menu keys; Fig. 2, elements 221 – 224); and a menu driver to facilitate a user to navigate directly from one activity to another (Blanchard: Col. 5, lines 28 – 39), in response to user inputs provided through the navigation button, including saving a first state of a first activity from which the user is navigating from, to enable subsequent re-entry into the first activity at the first state, and entering a second state of a second activity to which the user is navigating to, the second state being the state in which the user last left the second activity (Blanchard clearly discloses a first, a second, a third, a fourth and a fifth activities which can be

Art Unit: 2617

accessed using the navigation buttons as shown in Fig. 3, whereas the user can navigate from one activity to another or vise versa (Fig. 3, element 210 in the direction of Fig. 3, element 350 and vise versa), moreover, the darkened elliptical, represents the states of each activities (Fig. 3, elements 210, 320, 330, 340 and 350), for example, the user moves from the first activity of a first state to another activity, whereas if the user wants to come back from the another activity to the first activity, the first activity, previously accessed, will show the state having a darkened elliptical that the user accessed at the first activity previously, thus, the same rationale applies to the limitation claiming "entering a second state of a second activity to which the user is navigating to, the second state being the state in which the user last left the second activity" (Blanchard: Col. 6, lines 7 – 28 and Col. 7, lines 6 – 10 whereas if the user presses the Right arrow key, when viewing the Home screen or the alternative Home screen, the Phone Book menu screen will be displayed or vice versa).

Regarding claim 2, Blanchard as applied above discloses wherein the first activity is an activity selected from a call activity, a chat activity, a radio activity, and a web browsing activity (call activity such as phone book; Fig. 3); and the second activity is a different activity selected from the call activity (view all, recall entry, add entry, etc. under the phone book activity; Fig. 3, elements 320 – 324), the chat activity, the radio activity, and the web browsing activity.

Regarding claim 3, Blanchard as applied above discloses wherein the menu driver is further designed to facilitate a user to interact with selectable sub-

activities of an activity as a nested scrollable list of selectable sub-activities of the activity (Fig. 3).

Page 4

Regarding claim 4, Blanchard as applied above discloses wherein the mobile communication device comprises a wireless mobile phone (Fig. 2).

Regarding claim 5, Blanchard as applied above discloses a mobile communication device (Fig. 2) comprising: a plurality of functions to support a plurality of activities to be performed using the mobile communication device, the activities including at least a call activity (Blanchard: Col. 2, lines 26 – 51); a navigation button (menu keys; Fig. 2, elements 221 – 224); and a menu driver (Blanchard: Col. 5, lines 28 – 39) to facilitate a user to navigate among selectable sub-activities of an expandable sub-activity of one activity, including presenting the selectable sub-activities as a scrollable list nested in a presentation of the activity, the scrollable list replacing the expandable sub-activity and displaying only a one of the selectable sub-activities at a time (Fig. 3 clearly shows a scrollable list nested in a presentation of the activity in any one of Fig. 3, elements 210, 320, 330, 340 and 350).

Regarding claim 6, Blanchard as applied above discloses wherein the activity is a selected one of a call activity, a chat activity, a radio activity, and a web browsing activity (call activity; Fig. 3, element 320).

Regarding claim 7, the claim is interpreted and rejected for the same reason as set forth in claim 4.

Application/Control Number: 10/686,339

Art Unit: 2617

Regarding claim 8, the claim is interpreted and rejected for the same reason as set forth in claim 1.

Regarding claim 9, the claim is interpreted and rejected for the same reason as set forth in claim 2.

Regarding claim 10, the claim is interpreted and rejected for the same reason as set forth in claim 3.

Regarding claim 11, the claim is interpreted and rejected for the same reason as set forth in claim 5.

Regarding claim 12, Blanchard as applied above discloses wherein the activity is a selected one of a call activity, a chat activity, a radio activity, and a web browsing activity (call activity; Fig. 3).

## Response to Arguments

3. Applicant's arguments filed on 1/18/2007 have been fully considered but they are not persuasive.

In response to applicant's argument that Blanchard fails to teach the limitation "saving a first state of a first activity from which the user is navigating from, to enable subsequent re-entry into the first activity at the first state". The examiner respectfully disagrees with the arguments presented by the applicant. Blanchard clearly discloses a first, a second, a third, a fourth and a fifth activities which can be accessed using the navigation buttons as shown in Fig. 3, whereas the user can navigate from one activity to another or vise versa (Fig. 3, element

Application/Control Number: 10/686,339

Art Unit: 2617

210 in the direction of Fig. 3, element 350 and vise versa), moreover, the darkened elliptical, represents the states of each activities (Fig. 3, elements 210, 320, 330, 340 and 350), for example, the user moves from the first activity of a first state to another activity, whereas if the user wants to come back from the another activity to the first activity, the first activity, previously accessed, will show the state having a darkened elliptical that the user accessed at the first activity previously as well as if the user presses the Right arrow key, when viewing the Home screen (Fig. 4, element 210) or the alternative Home screen (Fig. 4, element 410), the Phone Book menu (Fig. 4, element 320) screen will be displayed or vice versa, thus, the same rationale applies to the limitation claiming "entering a second state of a second activity to which the user is navigating to, the second state being the state in which the user last left the second activity" (Blanchard: Col. 6, lines 7 – 28 and Col. 7, lines 6 – 10).

Therefore, the office action mailed on 12/28/2006 stands.

## Conclusion

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Application/Control Number: 10/686,339 Page 7

Art Unit: 2617

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Un C. Cho whose telephone number is (571) 272-7919. The examiner can normally be reached on M ~ F 8:00AM to 4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, George Eng can be reached on (571) 272-7495. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
